

# WRITE A FUNCTION TO COMPARE THE TIME

Team ID	PNT2022TMID18885
Project Name	Project - Personal Assistance for Seniors Who Are Self-Reliant

The screenshot displays the Node-RED web interface in a browser. The main workspace shows a flow titled 'Medicine reminder' with the following components: a 'timestamp' node, a 'function' node, a 'switch' node, and a 'medicine' node. The 'function' node is currently selected, and its configuration panel is open on the right. The 'Properties' section shows the node is named 'Name'. The 'On Message' tab is active, displaying the following JavaScript code:

```
1 var d = new Date();
2 var utc = d.getTime() + (d.getTimezoneOffset() * 60000);
3 var offset = 5.5;
4 newDate = new Date(utc + (3600000*offset));
5 var n=newDate.toISOString()
6 var date = n.slice(0,10)
7 var time = n.slice(11,16)
8 global.set('time',time)
9 msg.payload=date+" "+time
10 return msg;
```

The 'Enabled' checkbox at the bottom of the configuration panel is checked.
